With supervision from me and my RA Chris Hepner, she has designed a study to investigate the origin of multi-word production deficit in aphasia, has collected data from seven individuals with aphasia, transcribed and coded the data, and has learned how to graph and present her results. In addition, she has been familiarized with the basics of EEG testing, and has been helping my postdoc Svetlana in an EEG project investigating the origins of semantic and phonological interference in individuals with

- aphasia. Going forward, she will be included in the presentation and write-up of the data she has been directly involved in collecting and/or coding.
- 2018-2019 **Adna Jaganjac**, B.A. (Psychology and English, Emory University). Adna has joined the lab in August 2018 as the new lab manager, and is interested in studying the link between monitoring, metacognition and language learning.
- 2016-2018 **Jessa Sahl**, B.A. (Music and pre-med, University of Connecticut). Jessa was a full-time Research Assistant in my lab and has worked on several projects regarding language learning in children and individuals with post-stroke aphasia. She has a poster with me, and has also finished two projects on second language learning in children in Baltimore schools, and studying the role of inhibitory control in the production of agreement errors, the data for which are currently being analyzed. Jessa has been accepted into medical school at the University of Connecticut, and has started in August 2018.
- 2016-2020 **Christopher Hepner**, M.A. (Cognitive Science, Johns Hopkins University). Chris is a full-time Research Assistant in my lab, working on models of phonological working memory in speech perception and production. His second line of research focuses on exploring the cognitive architecture of spoken and written production. He is a co-author on a published paper, and two 6-page CogSci abstracts. He has had three oral presentations in major conferences based on his work with me, and is currently writing up two additional journal articles based on his work in the lab.
- 2015-17 **Nicholas McCloskey**, B.A. candidate (Psychology, Temple University). Nick was a full-time research intern and a part-time RA in my lab working on bilingualism. He is a co-author on two posters with me. He is currently a Research Assistant in the Linguistics programs at the University of South Carolina.
- 2015-16 **Kathleen Kelly**, B.A. (Psychology & Neuroscience, Rice University; post-BA pre-med student at Johns Hopkins University). Kathleen completed two semesters of Medical Tutorial credit in my lab, and learned collection of eye-tracking data. She was accepted to Georgetown Medical School in 2016.
- 2014-17 **Michael Freund**, B.A. (Psychology, University of Wisconsin). As my lab manager, Mike has been involved in several projects, and has co-authored Nozari, Freund, Breining, Rapp & Gordon (2016). I have co-mentored Niloofer on several projects, including collection of data from individuals with aphasia in Iran. I have been a co-author on four papers on which Niloofer has been the first author. Niloofer started her training as a PhD student in Speech and Hearing Sciences at UCSD in Spring 2017. She was awarded the ASHA's Graduate Student Scholarship in Fall 2017.
- 2014-15 **Kyle Schneck**, M.A. (Linguistics and cognitive science; University of Delaware). Kyle worked with me part-time for a year. He learned speech error coding, and is a co-author in Nozari, Dell, Schenck, & Gordon (2015). In 2016, Kyle accepted a position as the science writer for NASA.
- 2014-15 **Bonnie Breining**, Ph.D. candidate (Cognitive Science, Johns Hopkins University). I co-mentored Bonnie Breining on three projects all three of which are published in high profile journals. I was also on her dissertation committee. After graduation in Fall 2016, Bonnie accepted a postdoctoral fellowship at Dr. Hillis's lab at the Neurology Department at Johns Hopkins.
- 2014 **Sweta Joshi**, B.A. candidate (Psychology, McGill University), summer 2014. Completed a summer internship with me and learned audio and video coding of speech and gestures. She helped with coding the data for Nozari, Goksun, Thompson-Schill & Chatterjee (2015), and appears in the acknowledgment section of that paper.
- 2012-13 **Kristina Woodard**, B.A. candidate (Psychology, University of Pennsylvania). Worked with me for a year when I was a mentor in the Penn Undergraduate Research Mentorship (PURM) program. Wrote her Honors thesis with me, presented a poster with me at the 20<sup>th</sup> Annual Meeting of the Cognitive Neuroscience Society (CNS) in 2013, co-authored the article Nozari, Woodard, & Thompson-Schill (2014), and received the Morris Viteles Award for Excellence in Undergraduate Research in Psychology for her work with me. She was later accepted in to the clinical psychology PhD program at the University of Wisconsin.
